StarBillet

Star Billet was started by long time motor heads involved in racing, modifying and working on cars, trucks, motorcycles, boats and anything else that moves. The owners have been in this industry for a combined total of 60 years, starting several different product lines. With their experience and drive towards cutting edge products we know Star Billet will be a leading car and truck accessory company.

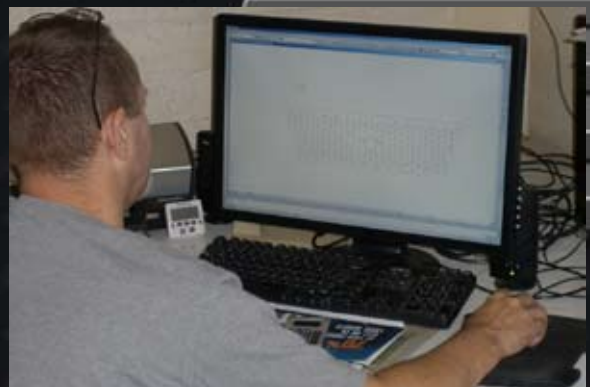

Star Billet is based in Tucson, AZ where each product is assembled and quality control checked. Every single piece is individually inspected for the 3F's – fit, finish, and function. We ensure customers will receive exactly what they are expecting.

Our products benefit from the latest in computer aided design and manufacturing. We start with drawings direct from the OEM and make our parts to fit those precise specifications. Accuracy is often to 1/10,000 of an inch - the best in the industry. Each design is virtually modeled in the computer first, and then prototypes are made. Following that, the products undergo an initial production run with detailed quality control checks and testing. Once a product passes these tests - and only then – is it released to production. We are so confident that we provide a real 21-year warranty on many of our products.

What makes us different?

We believe that a quality product is nothing without quality support. You can count on us to be there before, during and after your buying decision. No hassle support for shipping, installation and warranty.

www.StarBillet.com

StarBillet

Along with the standard aluminum and stainless steel billet grilles, Star Billet is offering a unique line of powder coated, colored grilles. These are currently available in red, blue, white, black, and gray, with chrome coming soon. We are looking to expand this selection in the near future. Star Billet is the only company to offer this product line. These colored billet grilles follow our same inspection process and include the same, 21-year warranty. Now your billet grille can match the color of your vehicle!!

Star Billet is also offering stylish grilles with new shapes and designs. We currently have available star, herringbone, and checkerboard patterns. Each grille is either laser or die cut in the U.S. They are easy to install with basic tools and, come in polished aluminum so will give that extra shine to your vehicle. These grilles follow the standard inspection process and warranty policy extended to all Star Billet products. Your vehicle will be the only one in town with this type of grille.

Star Billet offers an extensive line of billet grilles and HID conversion kits, as well as several new, innovative products. You never know what exciting line will come out from Star Billet next! Take a look through our catalog at some of these new ideas as well as the standard aluminum and stainless steel billet grilles. You won't be disappointed. We look forward to doing business with you!!

Thank you,
The Star Billet Crew
